Medical journals represent 37.5% in Turkey National Journals Database. There are 74 Turkish journals indexed in Web of Science. Of them 56 are indexed in SCIE. There are 32 (57.1%) medical journals in SCIE. Unfortunately there is no Turkish journal in SCI. Surgery as a discipline is the major branch of medicine with respect to total published manuscripts (1298). There are six medical branches in the first most cited 10 science branches. Turkish Journal of Pediatrics has the highest impact factor (1.93). There were 98 medical journals in National Medical Journal Database in 2009. It included General Medicine 28, Internal Medicine 7, Pediatrics, Ophtalmology and Chest Diseases have 4 journals in database. The important three medical schools are Hacettepe, Istanbul, Ankara Universities and they have a proportion of 32% of total publications.

Gulhane Military Medical School has the 6th rank in the list (3.6%). Ministry of Health Hospitals have a proportion of 10.8%. Ankara (34.3%), İstanbul (22.3%) and İzmir (7.1%) have a proportion of 63.7% in all published medical manuscripts. TAF Preventive Medicine Bulletin is one of the journal in ULAKBIM Turkish Medical Database. It has 6 issues per year. The official languages are English and Turkish. It was first published in 2002 and is a bimonthly publication produced by the Department of Public Health at Gulhane Military Medical Academy. The major topics covered by the journal are in primary health care services and preventative medicine. The bulletin has a panel of international referees. The journal is referenced in eight different indexes. The indexes are DOAJ, TÜBÝTAK Turkish Medical Index, EBSCOhost, CAB Abstracts, Global Health Database, Index Copernicus, Turkish Medline, and Google Scholar. The bulletin can be reached via the URL: <http://www.korhek.org> or <http://www.tafmed.org>.

According to National Database Citation Ranking, the bulletin is ranked number two in Turkey among medical journals. TAF Preventative Medicine

Bulletin aims to join the SCIE within the next five years. Another journal is Bulletin of Clinical Psychopharmacology. It is a peer-reviewed journal published quarterly in English and Turkish since 1990. Its topics of current interests are subjects in psychopharmacology, psychiatry and behavioral science. It aims to add original studies conducted in Turkey to international scientific knowledge, to encourage original research conducted in Turkey, and to promote the international reputation of Turkish scientists.

Bulletin of Clinical Psychopharmacology has a target audience of specialists, residents and scientists in psychiatry, psychology, neurology, pharmacology, molecular biology, genetics, physiology, neurochemistry and related sciences. The journal is covered by SCIE (Science Citation Index-Expanded) and 17 different indexes. The journal's impact factor is 0.271 and has a rank 12th in Journals from Turkey indexed in Web of Science and has the 6th rank in national impact factor list. Its web address is www.psikofarmakoloji.org.
